Our educational summer program helps to supplement educational goals to expand access to unique learning experiences during summer months, including field trips, interactive materials, presentations, and guest speakers. Our program utilizes various methods of learning and implements activities with an emphasis on

- Science, Technology, Engineering, Arts, and Math (STEAM) learning objectives.
- Providing social and emotional intervention and educational services, where students are able to learn, practice, employ, and maintain positive emotions management skills appropriately. conflict management techniques, and healthy thinking patterns.
- Learning, growing, and developing fundamental reading and comprehension skills.
- Practicing basic principles of citizenship to facilitate positive communication, empathy, and
- understanding the importance of servicing the community around them.
